

BioTherm™ Waste Digester

- Sewage
- Manure
- Cellulose wastes
- Lake/pond algae
- Formaldehyde Free
- Certified safe for sewers

Biodegrades it all quickly into Water, CO₂ and a tiny bit of Biomass (protein).

Mix ratio: 1 : 1000
(1 ml BioTherm to 1 L of liquid waste)

LubeCorp Manufacturing Inc. is the purveyor of the **All-SAFE™** industrial fluid product line:

Outperforms while providing uncompromising safety

1. **Work-SAFE:**
Safe for lungs, hands and eyes
Fireproof and Smokeproof
Non-toxic
2. **Nature-SAFE:**
Safe for all ecosystems
Direct sewer disposal
UL Ecologo certified
3. **Cost-SAFE:**
Superior performance
Greater productivity
Lowered overall costs

BioTherm Eliminator® Waste Digester

BioTherm™ Waste Digester

Eco-toxicity Classification:

Practically Non-Toxic

Assures BioTherm Safety

BioTherm Eliminator is recommended for use in all Waste water treatment systems: Trains, Ships, Airplanes, RV's, Septic Tank Systems, Farm Wet Manure Systems.

BioTherm quickly catalyzes the degradation of sewage, manures, cellulose, wastes, etc. without itself being depleted.

VIA Rail has proven remarkable cleanup of their railway sewage tanks as they travel across Canada from coast to coast.

BioTherm™ Waste Digester

Through its biodegradation process also eliminates:

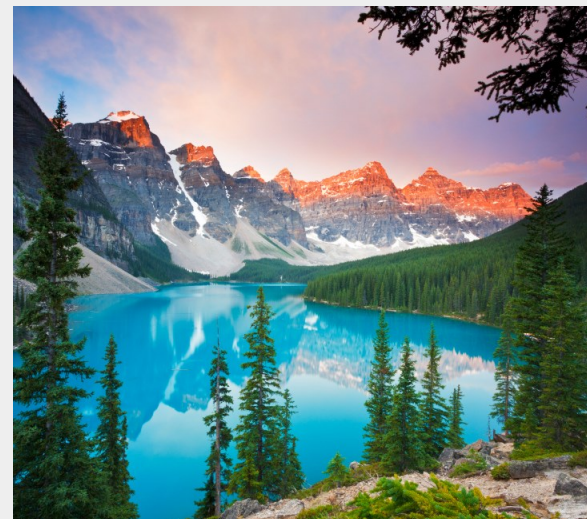

- ◆ Phosphorus
- ◆ Sulphates
- ◆ Nitrates

BioTherm eliminates Struvite (kidney stones) in sewage by dispersion of the Calcium, Magnesium, and Uric Acid deposits.

NOTE:

BioTherm and treated liquids like sewage, liquid manures, wastes, etc. must always be agitated in some way, by pumping or shaking, bubbling, etc. to assure effective interaction of the biodegradation process.

Hazardous Material Identification System	
BIOTHERM ELIMINATOR WASTE DIGESTER	
HEALTH	0
FLAMMABILITY	0
PHYSICAL HAZARD	0
PERSONAL PROTECTION	A

LubeCorp's exclusive ALL-SAFE™ formulas are certified by Environment Canada, under the Environmental Choice Program, which ensures stringent requirements.
