

LUBRITHERM® ALL-TEMP SYNTHETIC HYDRAULIC FLUID

GREENCUT PROVIDES EXCEPTIONAL GREENCUT = SAFE LUBRICATION—BURNISHING—COOLING OF THE WORK PIECE

PROVIDES FULL THERMAL STABILITY FOR LIFE (5 YEARS MINIMUM) EVEN AT EXTREME OPERATING TEMPERATURES AND PRESSURES.

- LubriTherm offers exceptional anti-wear lubrication properties.
- Provides full thermal stability for life (5 years minimum) even at extreme operating temperatures and pressures.
- Can function effectively in an ambient extreme temperature range of -60°C to +80°C (-75°F to +175°F).
- **Versatile Pressure Range:** Operates Hydraulic/Hydrostatic Systems ranging from 15 psi to 6,500 psi.
- **Broad Application:** Suitable for Industrial, Military, and Mobile equipment.
- **Compatibility:** LubriTherm is compatible with all standard hydraulic seals and metals. It doesn't break down under severe operational pressures or temperatures.
- **Longevity:** LubriTherm stops change-outs for five years, ensuring long-term use without the need for frequent replacements.
- **Ease of Transition:** Switching to LubriTherm from oils, esters, or ethylene hydraulics is straightforward, allowing for easy integration into existing systems.

SAFETY FEATURES

- Humansafe
- Fireproof
- Non-toxic
- Biodegradable
- No breakdown

SUPERIOR PERFORMANCE IN THE FOLLOWING APPLICATIONS

- Machining
- Cutting
- Grinding
- Drilling
- Tapping
- Excellent for liquid CNC controlled Plasma Arc Cutting Tables
